Evergreen Foam & Insulation
1416 Gavin St.
Raleigh, NC 27608

To Whom It May Concern:

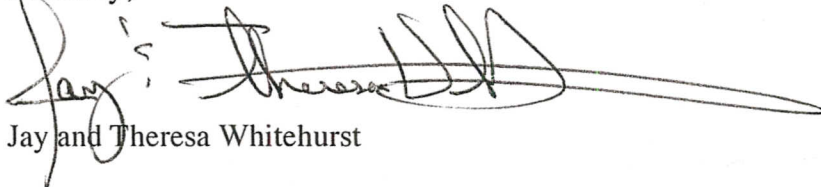

Evergreen Foam & Insulation installed their Demilec Sealeaction 500 open cell spray foam insulation in our home in 2008.

Their crews maintained an organized jobsite throughout the entire job and left our house in clean order. They had a field manager on the jobsite almost the entire time. That individual was there to answer our questions and lead the crews per our superintendant's specifications. The job was completed within the timeframe allotted and within our budget.

The performance of the product goes without saying. The attic temperature was well over 120 degrees the day before spraying. The day after completion, and each day since, the attic temperature has been within a few degrees of the conditioned space below.

We are very pleased with the performance and installation of the foam Evergreen installed in our home.

Sincerely,
